Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP-A-10-009235 in view of JP-A-165256 and JP-A-199123.
3. Japan '235 teaches Applicant's claim limitations including : a "number of staple members" – 1, a "tearable fim" including 12. Although the reference does not illustrate the film is laminated from porous film as claimed, such technique is well known to one of ordinary skill in the tearable film art as shown by Japan '256 and Japan '123. It would have been obvious t one of ordinary skill in the art at the time of the invention to provide the film or Japan '235 using lamination technique as disclosed by Japan '256 and Japan '123 in order to provide a film that is easy to tear using known methods of manufacture.
4. As regards claim 2, Japan '235, as relied on, discloses hole size and spacing are well known in the art.
5. As regards claims 4, 6, inasmuch as reference, as relied on, describes the structure as claimed. In this case, further recitation of the process that produces the claimed structure does not clearly further define any particular structure of the claimed

invention that can be relied on to patentably distinguish from the structure of the prior art. Inasmuch as a product claim is defined by its structure, such a claim including a product-by-process limitation is interpreted as including the structure formed by the process, not as a method step (as it would be in a process of making-type claim). In any case, reference discloses manufacture technique that reads on process.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
7. U.S. Pat. No. 4,791,014 to West.
8. U.S. Pat. No. 5,733,085 to Shida.
9. U.S. Pat. No. 6,086,304 to Hujishima.
